## Customer guide

Do you need a music video for your web page or as a background for live performances?

I will create something special for you, based on fractal shapes.

If you're looking to purchase such unique fractal art, you are in the right place!

Here is a small guideline:

1. Shapes
2. Effects
3. Movement
4. Composition / Preview
5. Output
6. Prices
7. Credits/References

First of all!

You don't have to choose fractals or effects.

I can create something for you that fits your music!

But if you'd like to affect the style, tell me your vision.

1.

Shapes

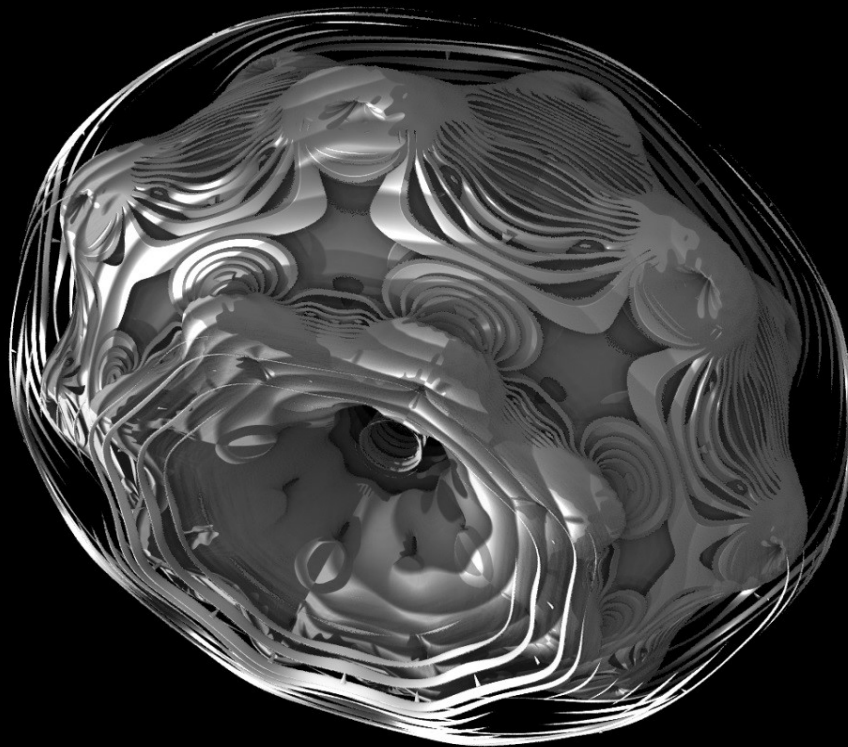

There is an undefined number of fractals and/or hybrids.

Here are some examples:

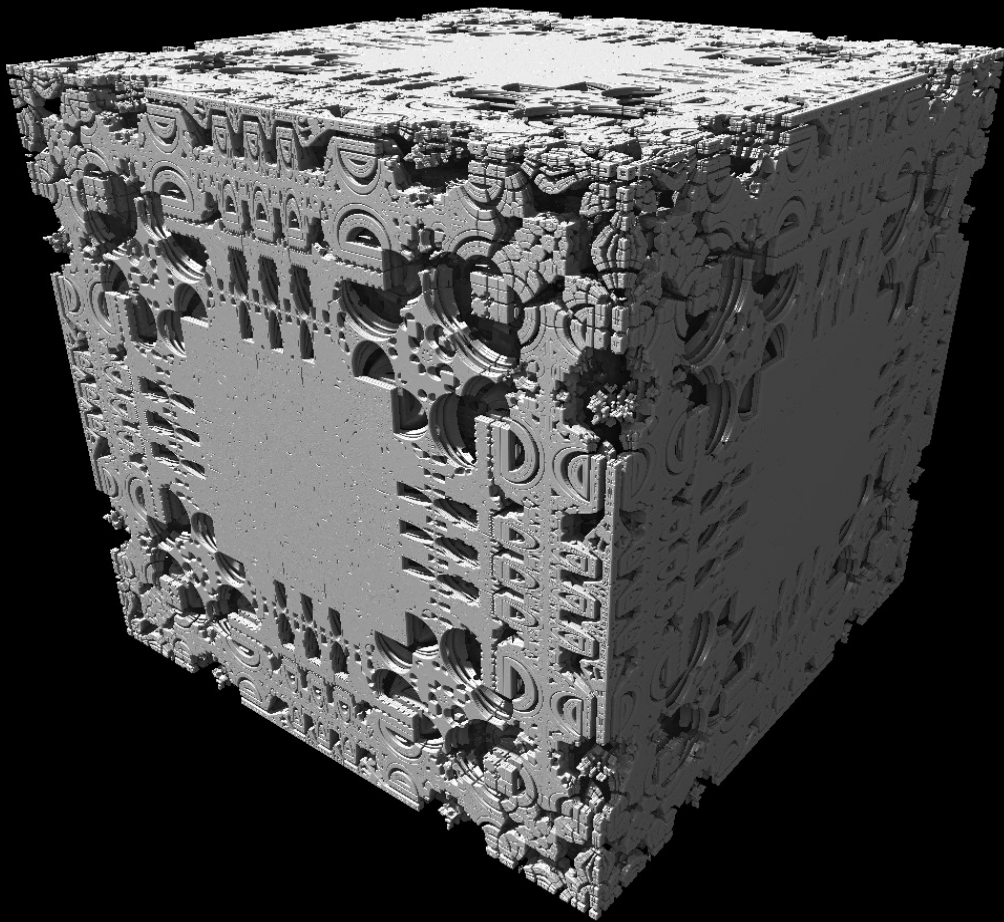

You can choose one of them, combine them, or tell me your vision of a shape.

We will find something, that fits your imagination!

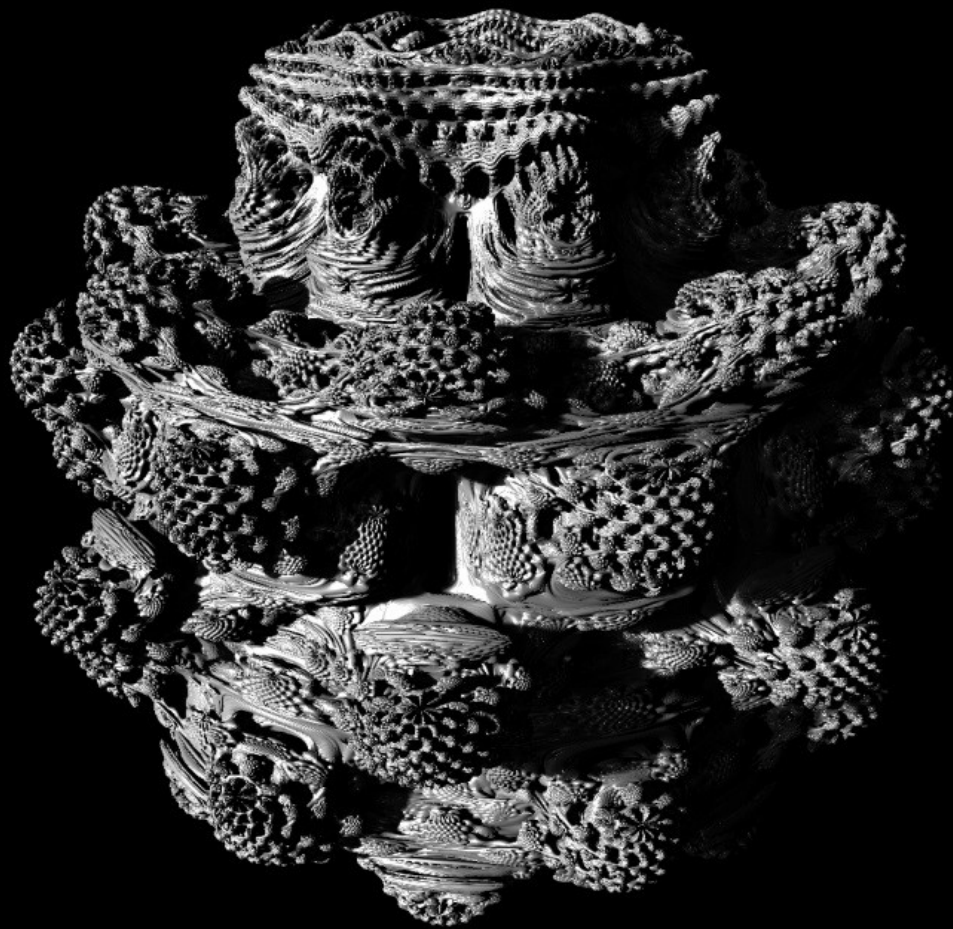

Benesi Pine Tree

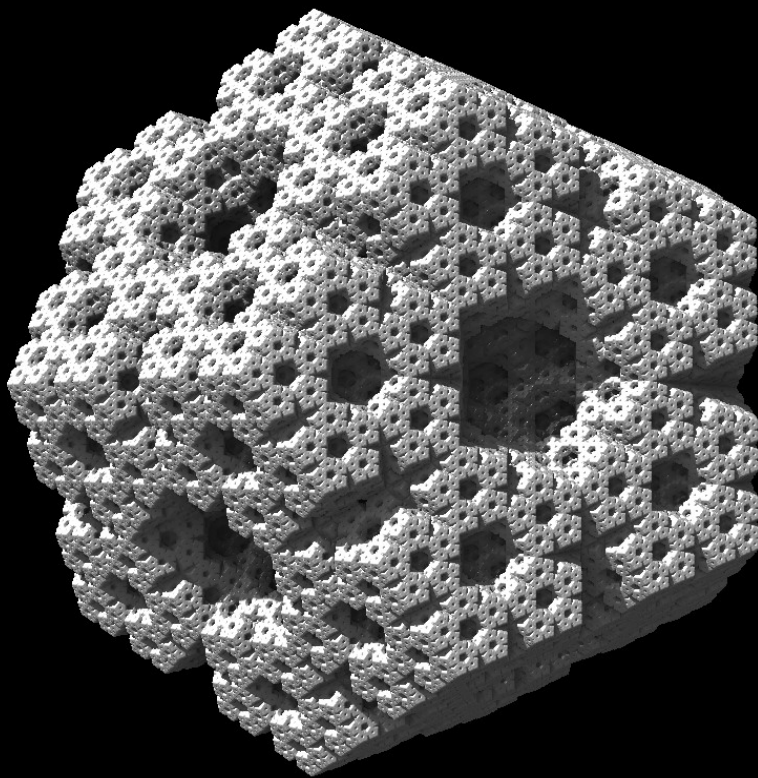

## Fold Box

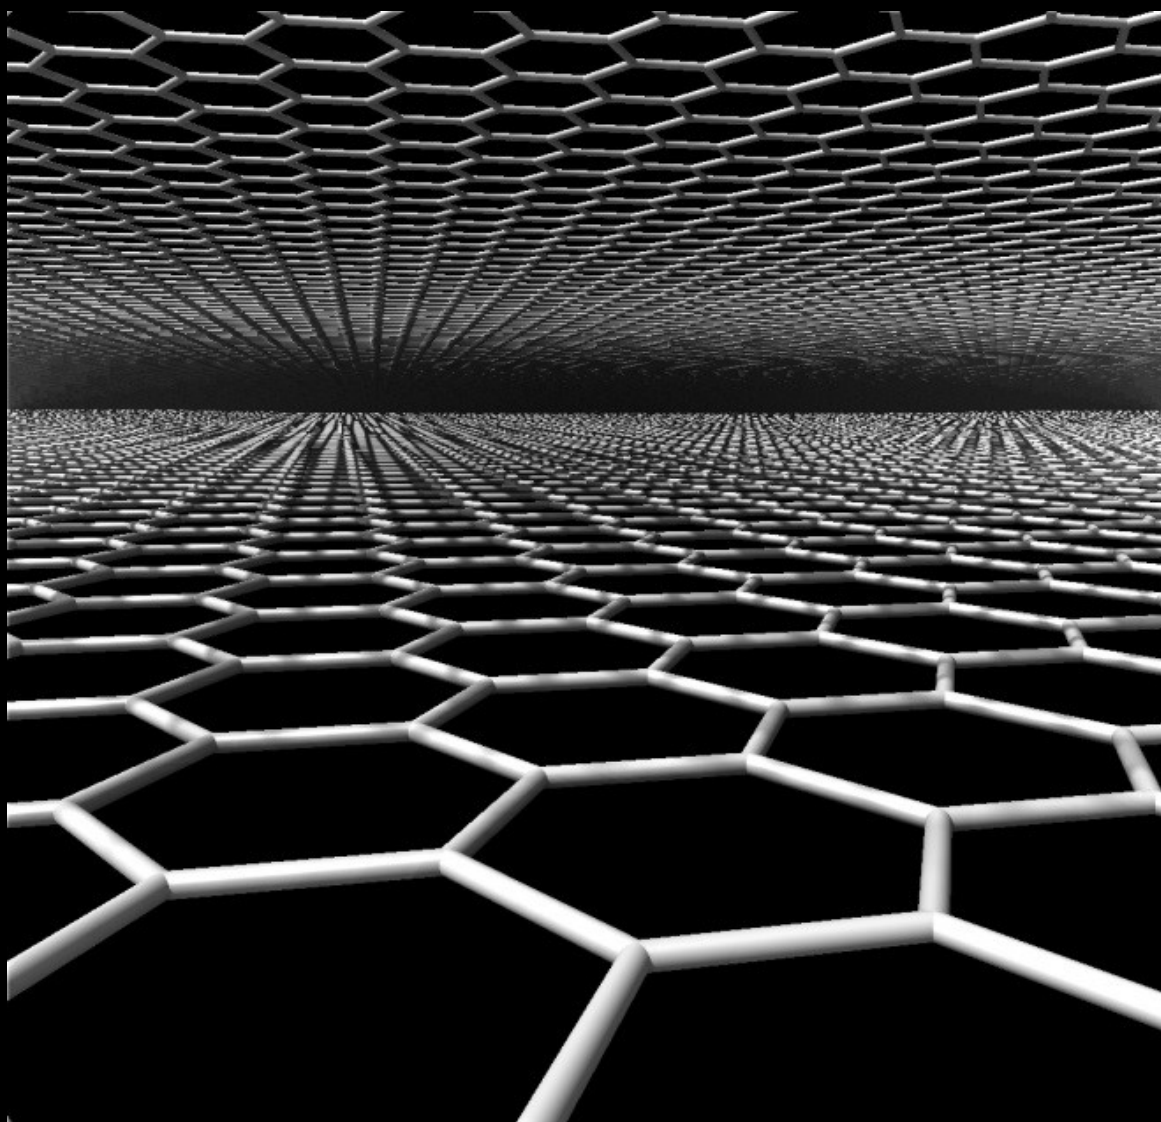

Mandelbulb

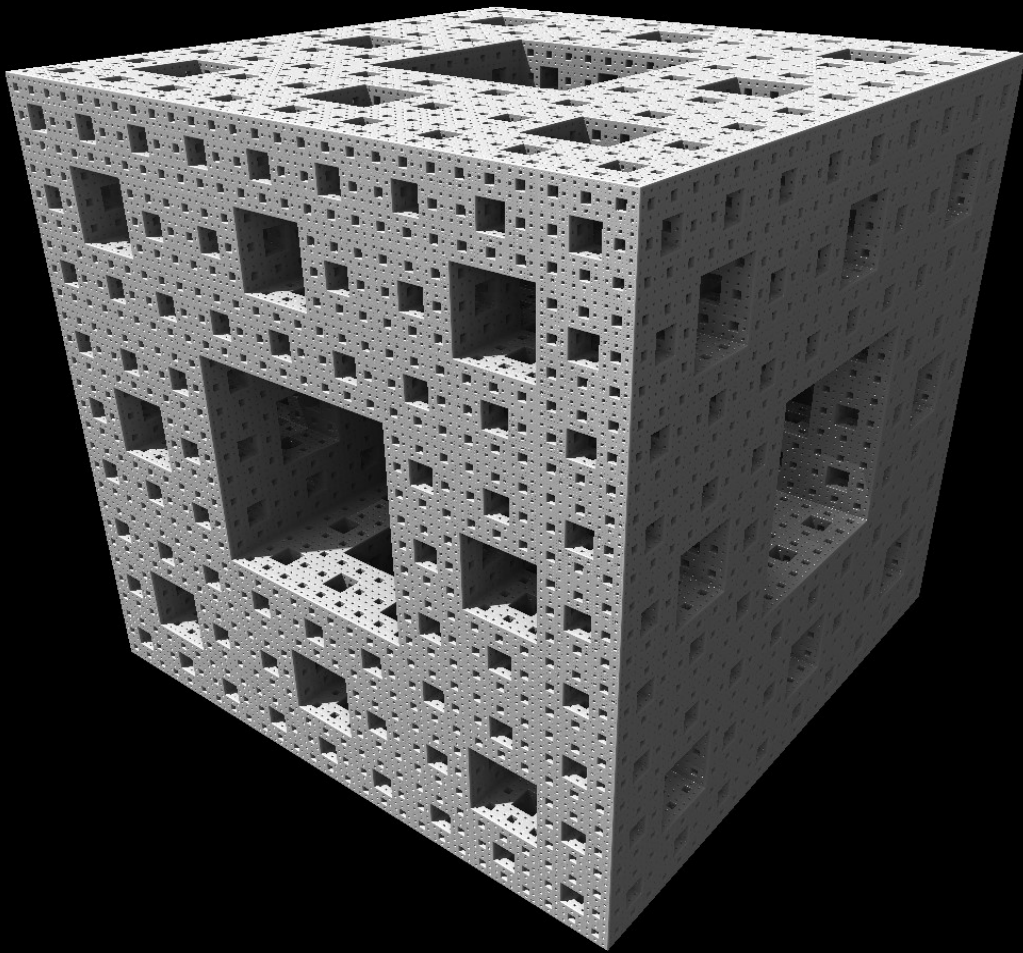

## Kaleidoscopic IFS

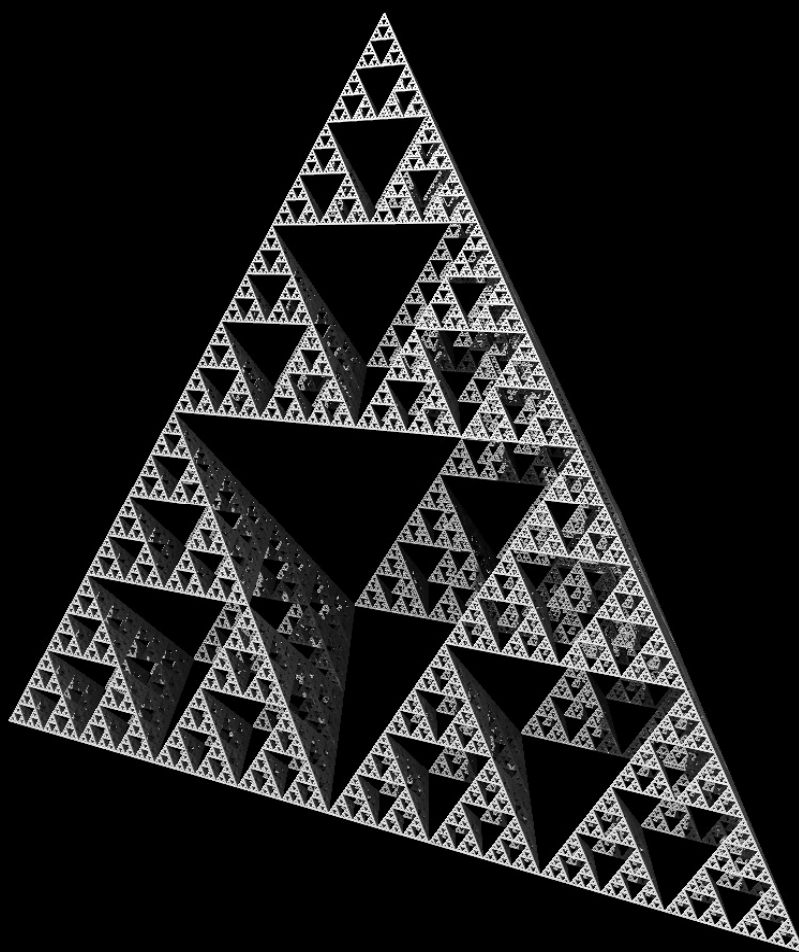

## Hexagonal Grid

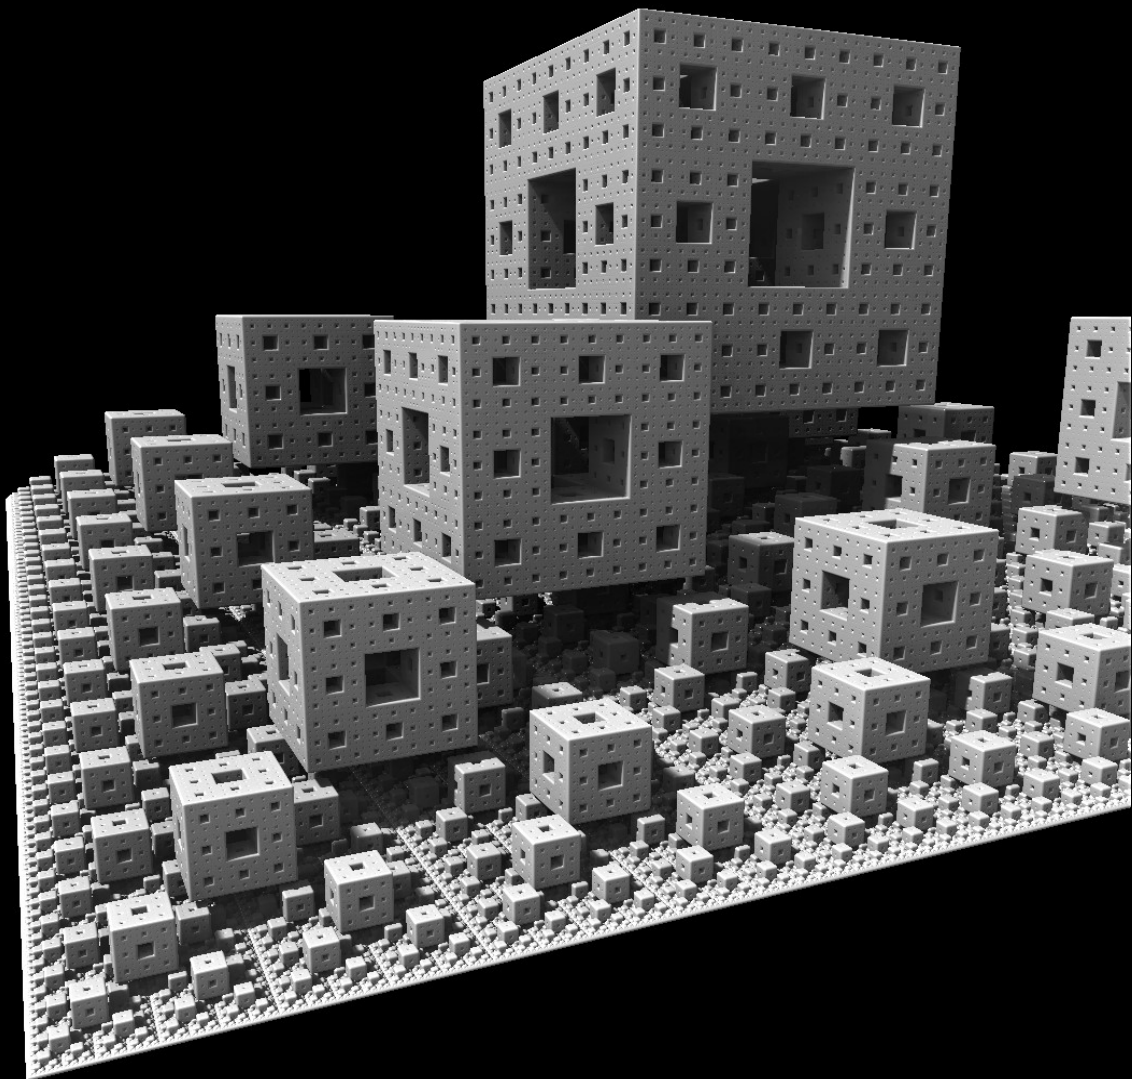

Menger Sponge

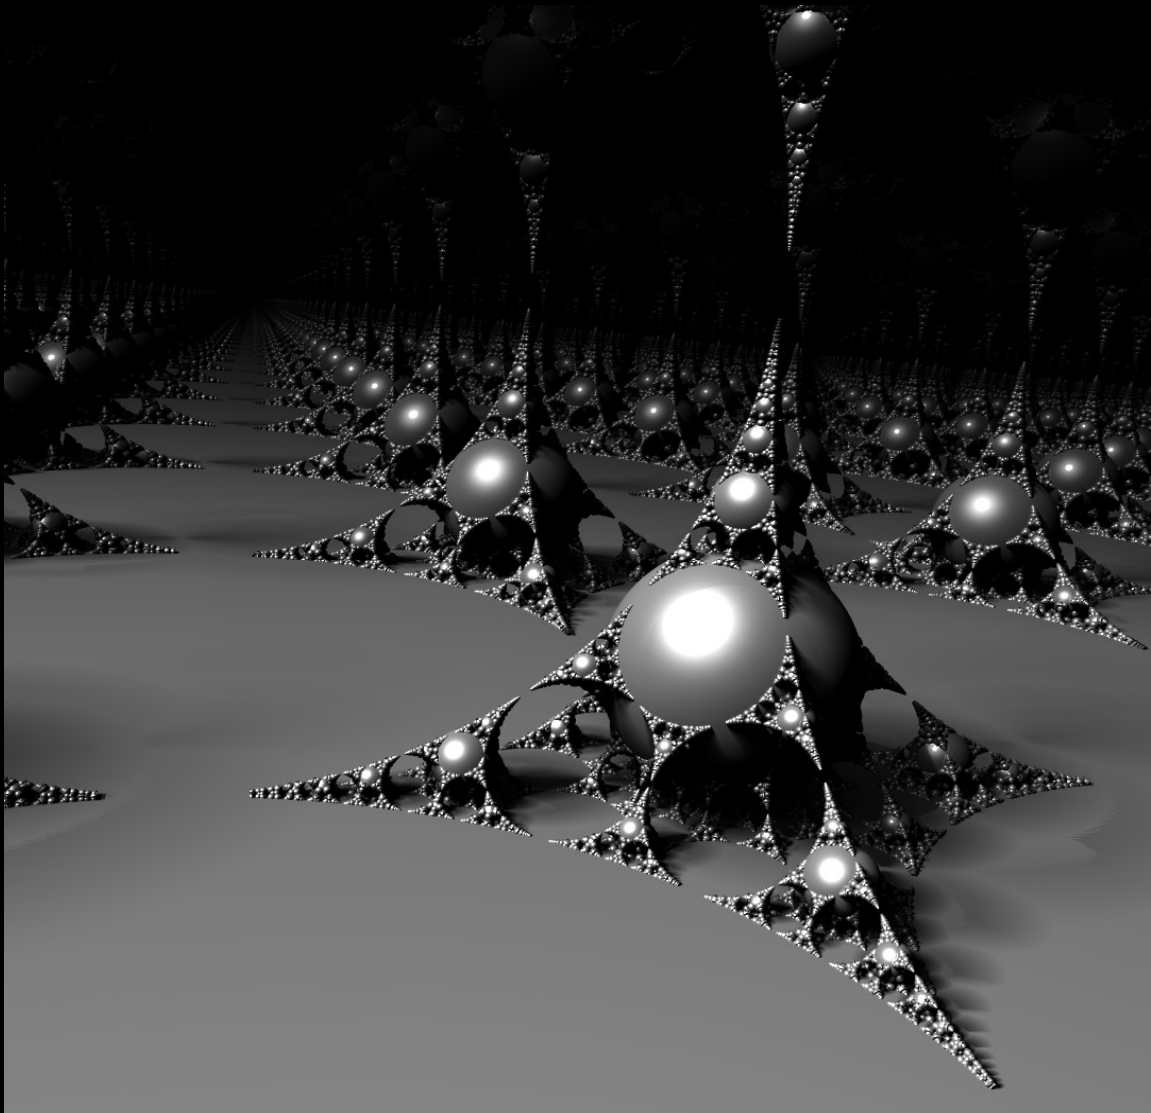

# Sierpinski Triangle

DIFS Menger Sponge

Josleys Kleinian

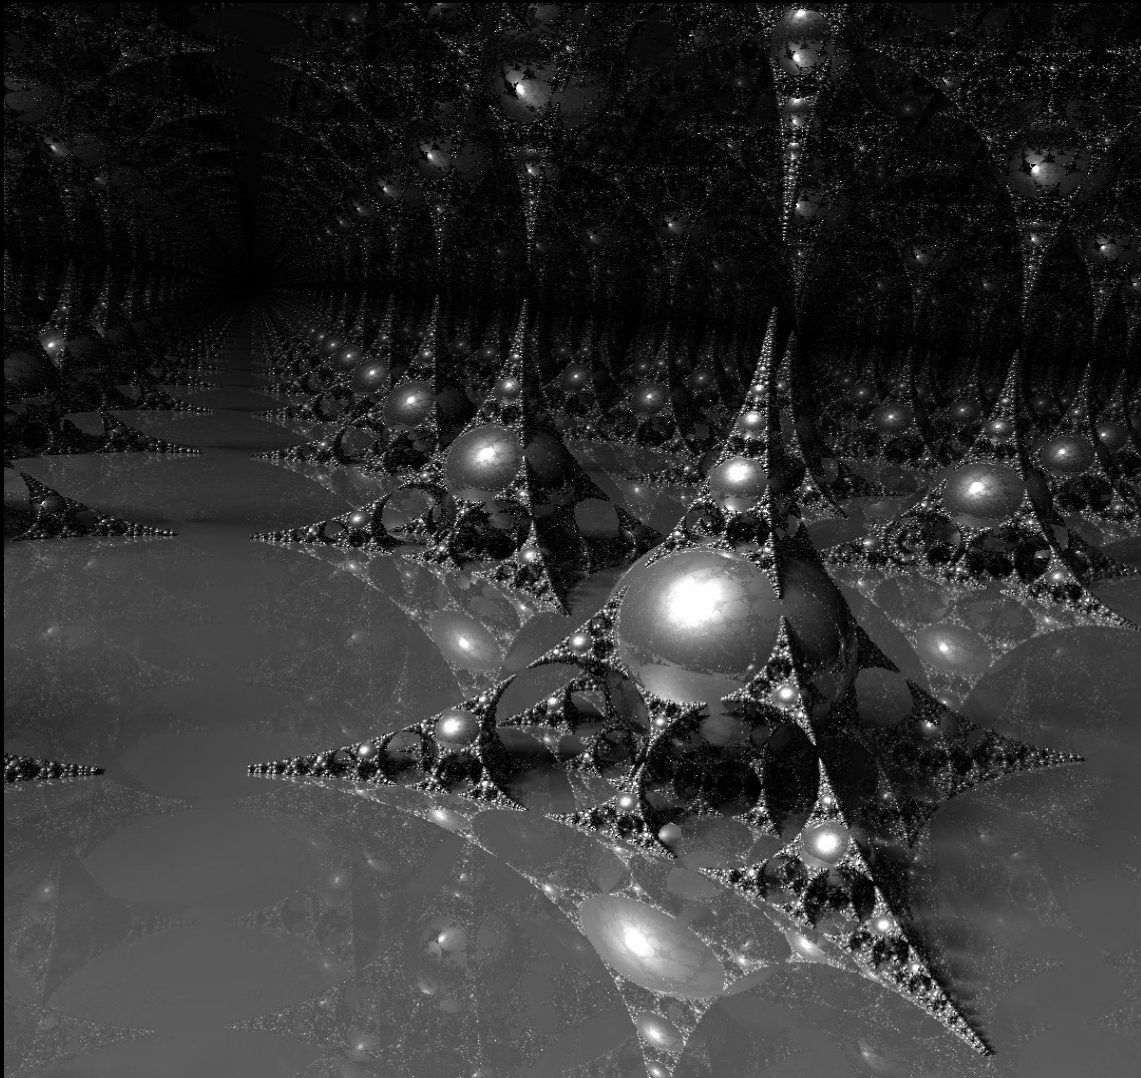

...and many more!

2.

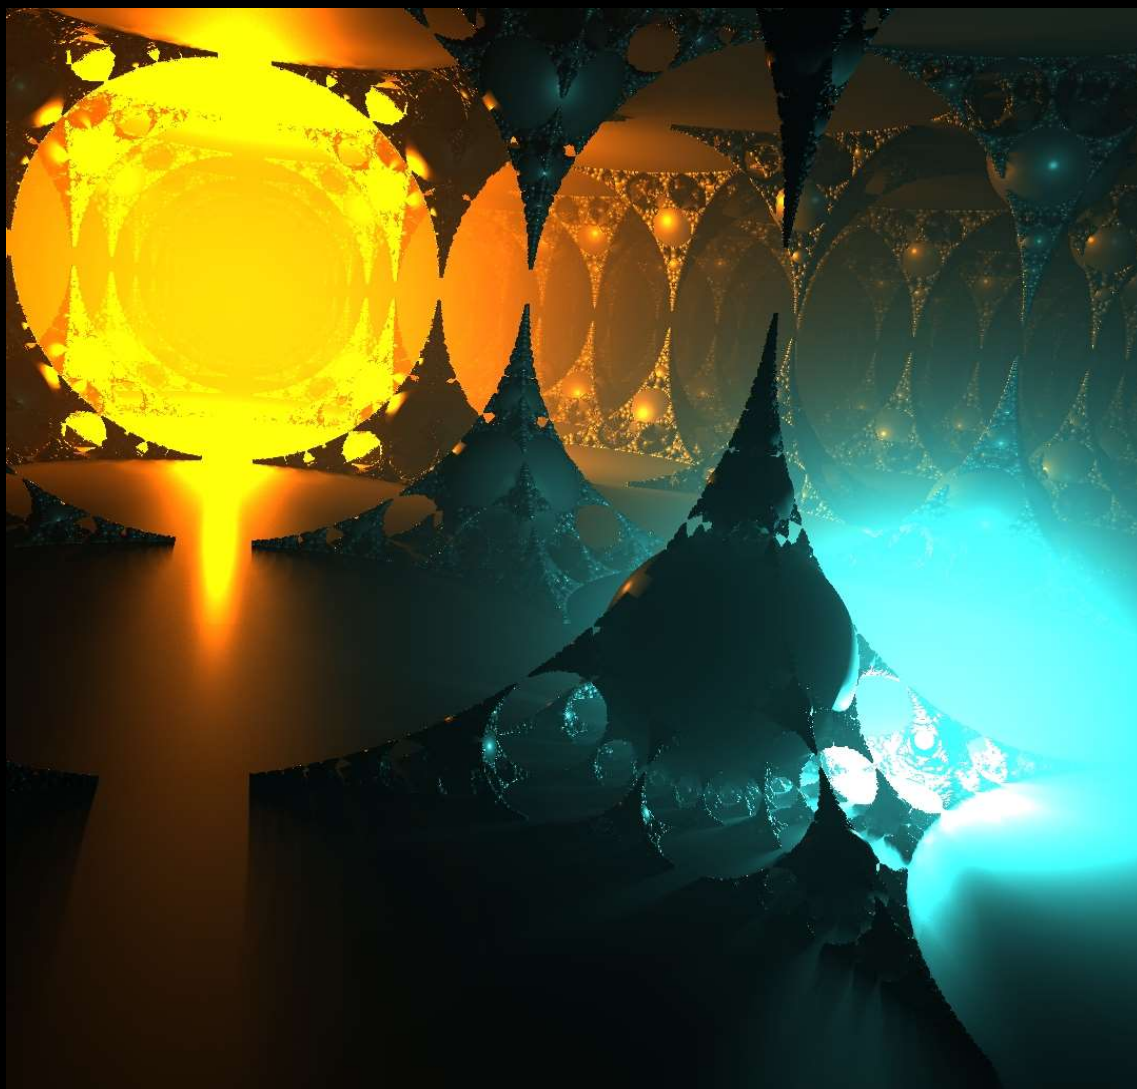

## Effects

You can choose from a large selection of effects!  
Here are some examples based on the Josleys Kleinian fractal.  
All effects are adjustable in every direction.  
You can also combine effects.

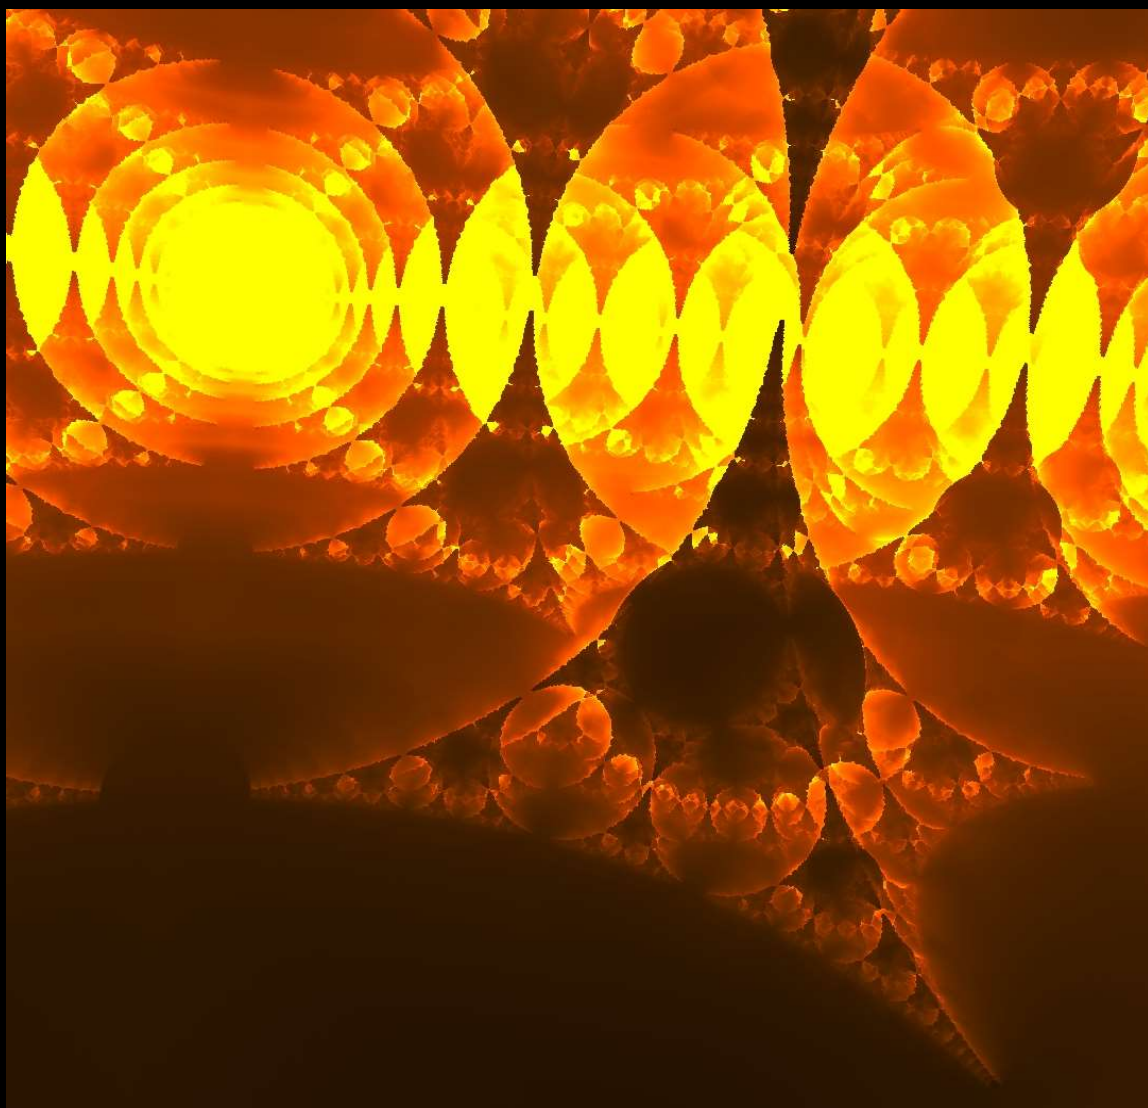

### Reflection

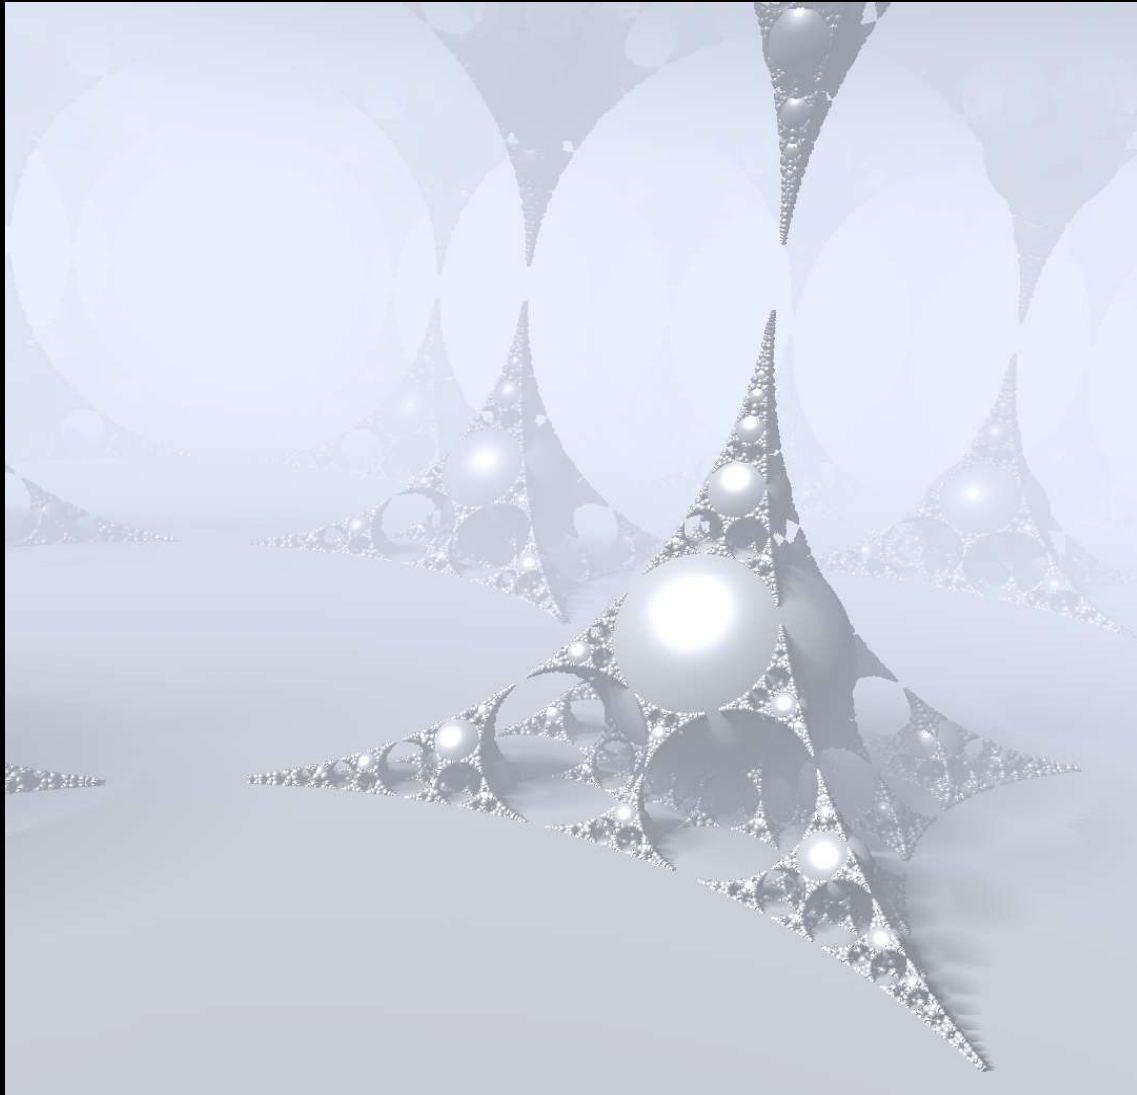

## Lighting

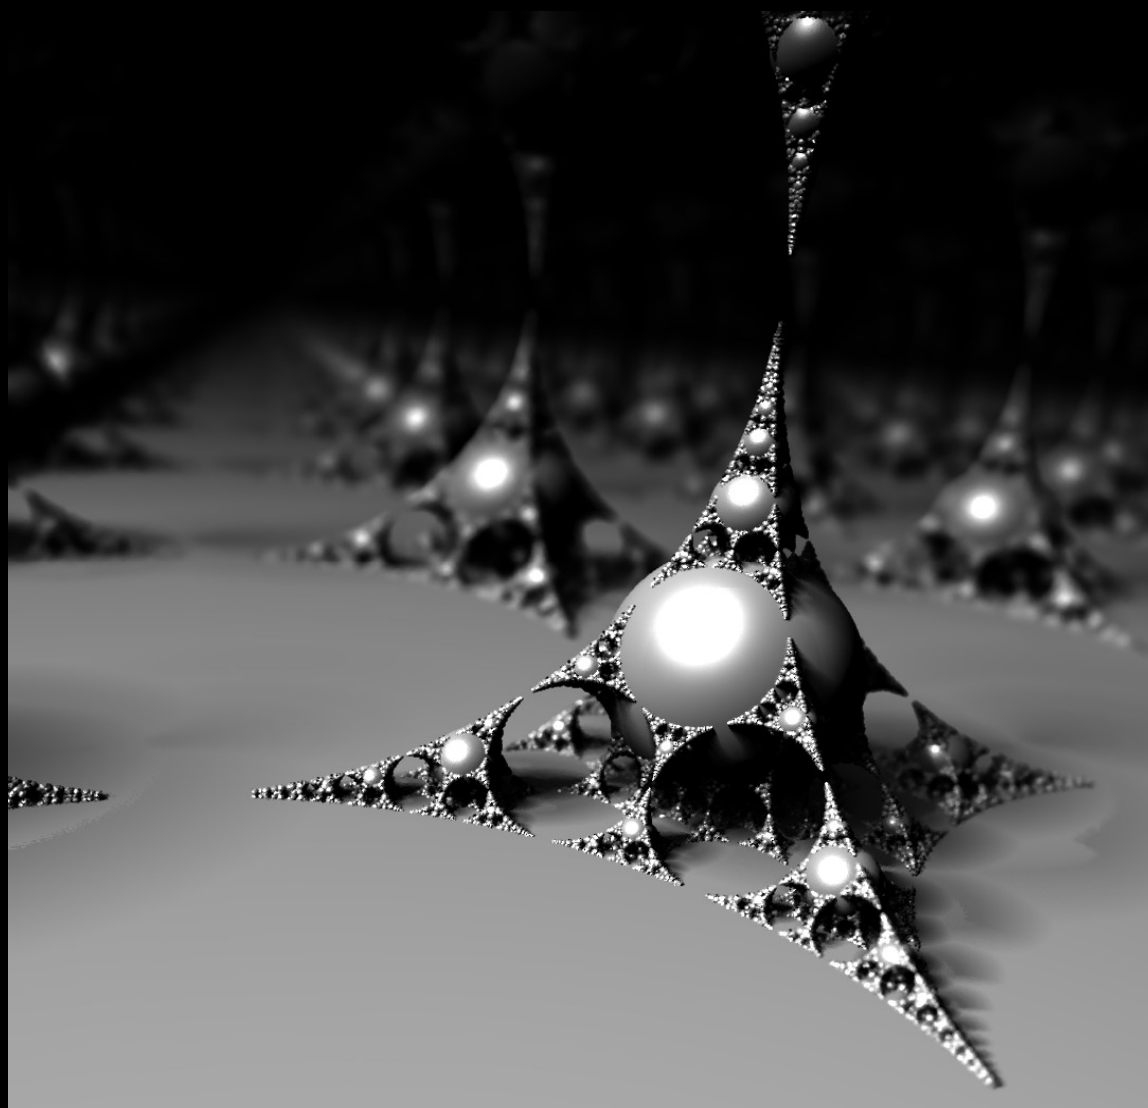

Glow

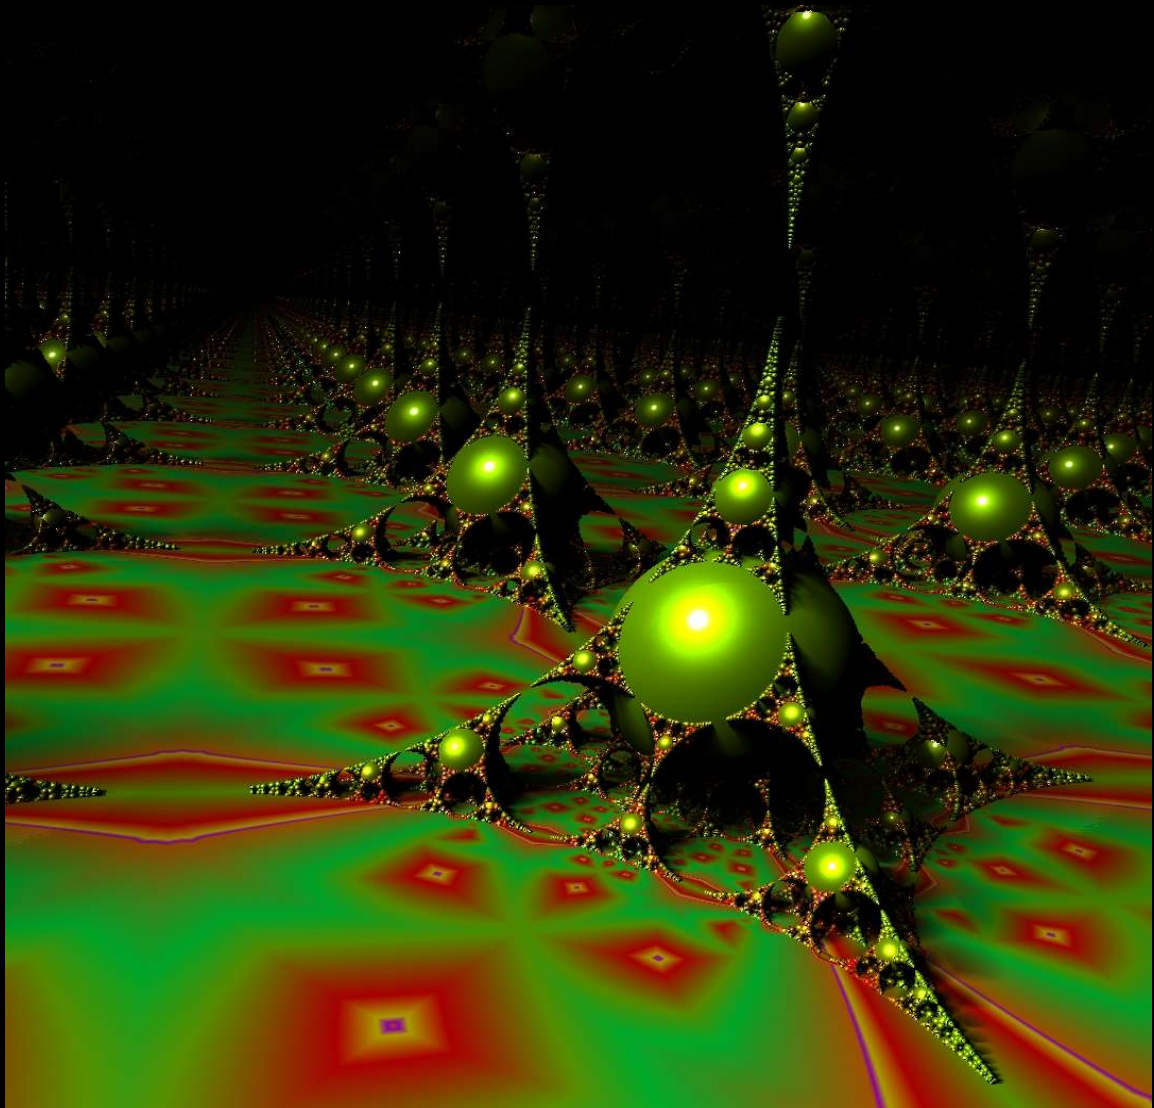

Fog

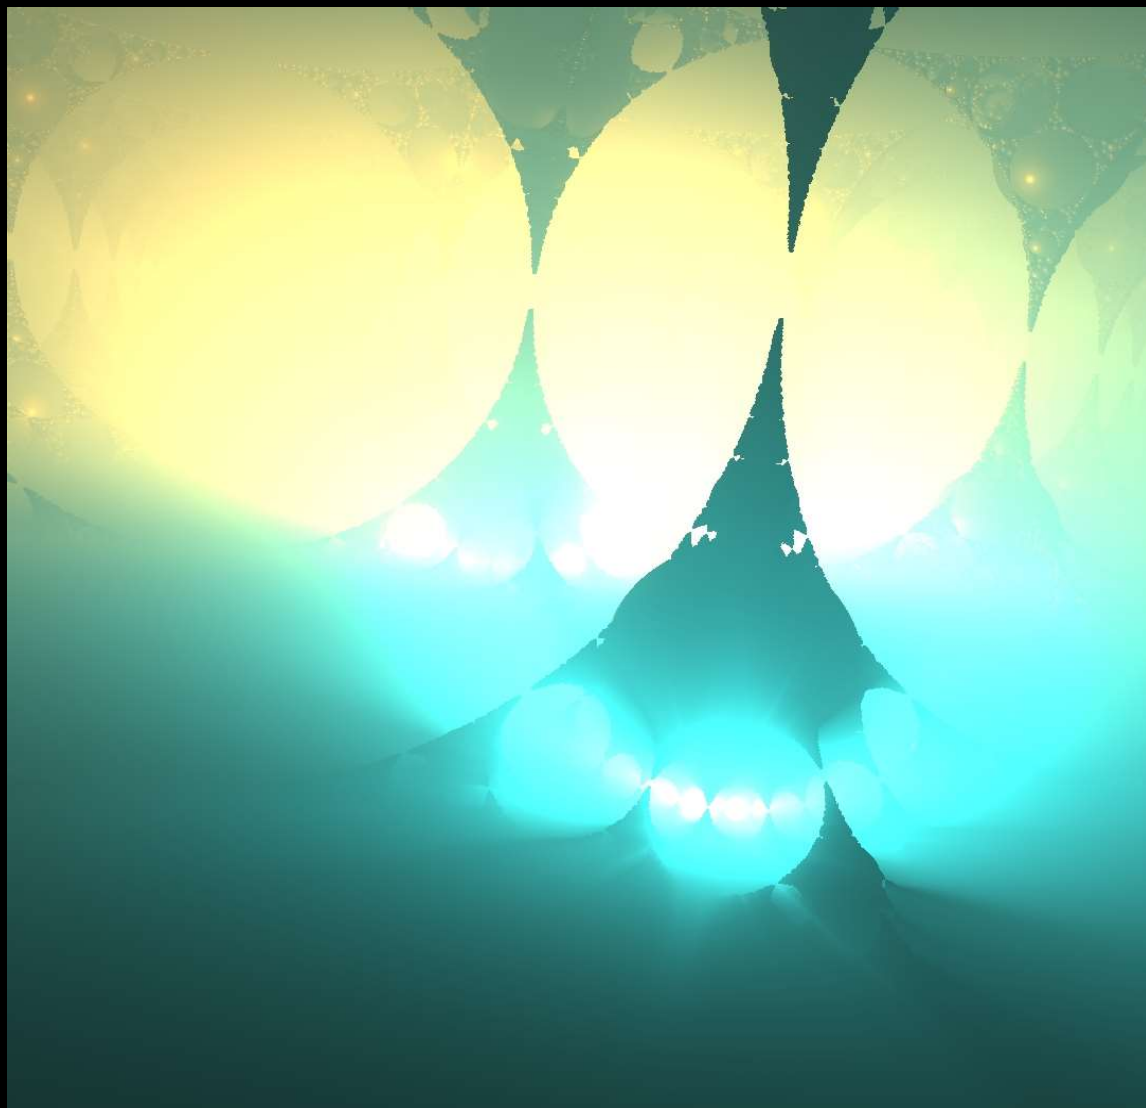

Depth of field

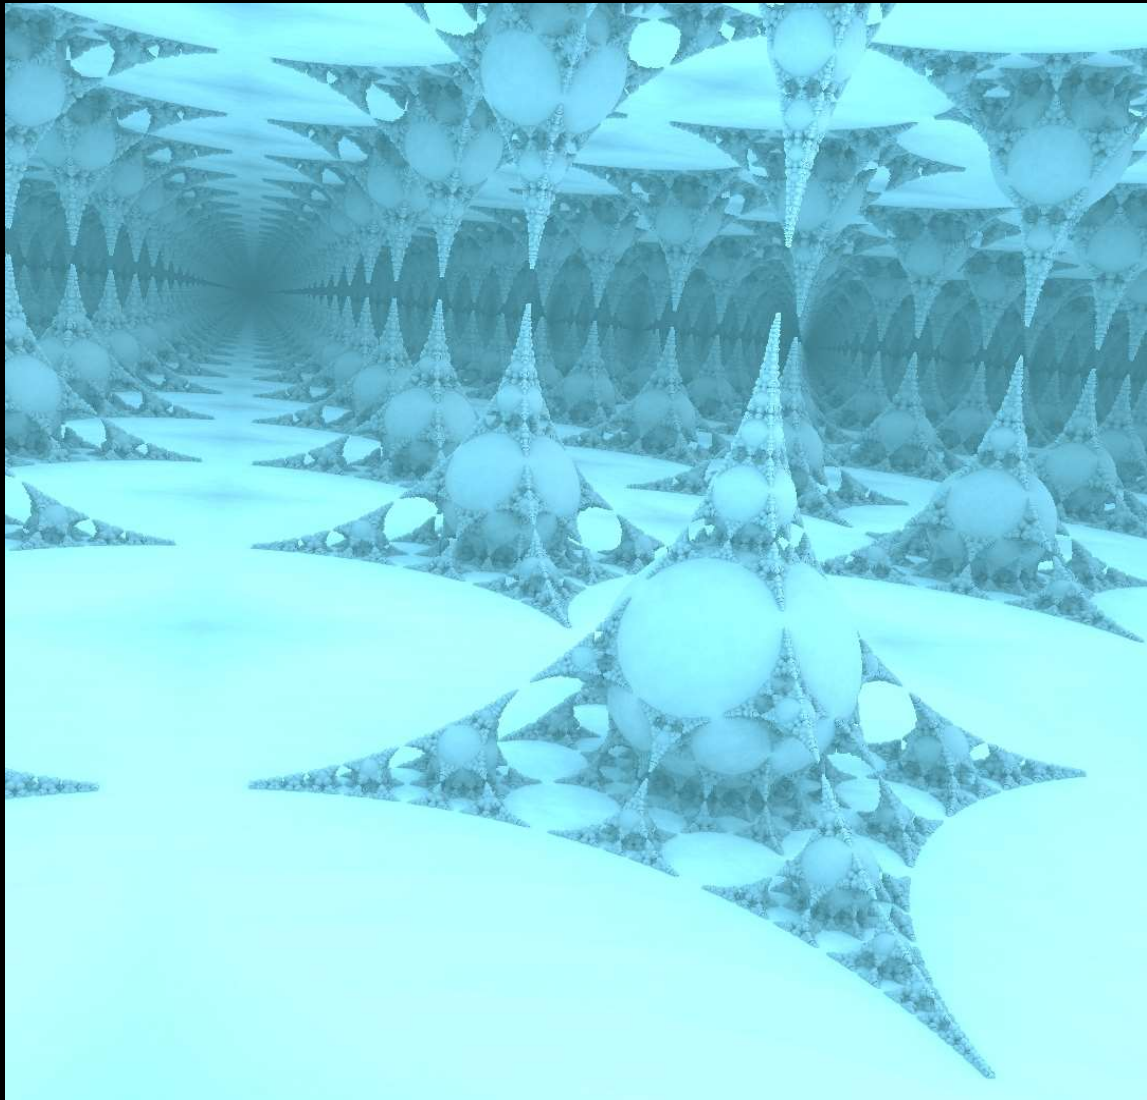

## Colorization

## Volumetric lighting

Multiple ray occlusion

...and many more!

3.

Movement

The possibilities are infinite.

We can create a slow travelling effect within the chosen fractal.

We can zoom deep into the smallest details.

We can create a wild rollercoaster ride through the fractal.

Or we can just have a fixed view on a envolving shape.

It's all in your imagination!

4.

Composition/Preview

You want four fractals together in one scene? No problem!

You want reflecting spheres flying around everywhere?  
You will get it!

Maybe you'd like some red refracting glass cubes rotating around?  
For sure!

If you want lights or shapes to move/react to the sound of your kick drum?  
I can do it!

Please send me your music, for which I am creating the video, as a  
download link or by email as a WAV file.

Once I know your vision, I can start to create the scenes.

If you are not sure if you will like the style of the video, then I can  
send you a free 10-30 second preview video.

In this editing phase you can always ask for changes!

If you're happy with the preview, I will send you pictures of the  
further process steps.

This is the point of no return!

When all scenes are rendered, I will put them together in one video.

I can send you the 'naked' video file, or I can add text/logos etc.

5.

Output

You can choose any resolution for your video up to  $7680 \times 4320$  pixels.  
The frame rate is possible up to 120 frames per second.

Formats:

avi

H.264

H.265

MPEG2

MPEG4

Standard is H.264 codec at 25 frames per second.

If you have any special requirements, please write to me  
with your ideas, thoughts and wishes.

After converting, I will upload the finished file and  
send you the download link.

With your permission, I can also upload the finished video  
to my social media platforms.

If you would prefer I didn't do this, just let me know!

6.

Prices

All examples are for 25 fps including postprocessing.

1920 x 1080

35€ per video minute

3840 x 2160

65€ per video minute

7680 x 4320

250€ per video minute

Effect prices

1 effect + 5€ per video minute

2 effects + 10€ per video minute

3 effects + 12€ per video minute

4 effects + 14€ per video minute

5 effects + 15€ per video minute

Volumetric lighting

15€ per video minute

Other resolutions available on request.

For videos longer than 10 minutes, please contact me for a quotation.
