## G-41 series

Our love of Sapele knows no bounds. A body of all Sapele, matched with our active bracing, has proved to be a guitar who's tone even out shines its undeniable exquisite looks. Using a hard wood like Sapele for a top is not new, but our execution is uniquely successful.

### quality materials and components

|              |                                   |
