Description:

The original **Steinberger** USA "M" series guitar is back! First produced in the **Steinberger** factory in Newburgh, NY, the "Newburgh" M-series was originally inspired by Mike Rutherford of Genesis and built by English luthier Roger Giffin. These distinctive instruments feature a flat-top with arm scarf, dual cutaway hard maple body and complimentary body binding. Built 100% in the USA, this professional instrument is a true blend of tradition and innovation combining the new, adjustable composite neck with a traditional full-size maple body. Add to that, two active EMG-85 humbuckers and the original **Steinberger** S-Trem with 40:1 direct-pull tuners and a patented DoubleBall headless system and you've got a high-performance guitar that's perfect for all types of music. Discover the "State of the Instrument" again, with the new, reissue **Steinberger GM-2S "Newburgh"**.
