Plug In Your Device

Plug In Your USB Cable

Windows will begin standard hardware driver installation.

Connect your Line 6 hardware directly to your computer's USB port now (do not use a USB hub). The Found New Hardware Wizard will run.

If you see the dialog illustrated on the right, click Continue Anyway.

Hardware Installation

The software you are installing for this hardware:

Line 6 TonePort UX1

has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.

[Continue Anyway]   [STOP Installation]
