

# Technical Rider – Tears of Night

Stage Plan:

## ***Drum Info***

Unfortunately we have no drummer at the moment. That's why we'll have a playback track for the drums. This track will be controlled on stage.

## ***Microphones***

Following microphones are needed:

- 1 vocal microphone for our lead singer (suitable for female voice)
- 1 vocal microphone for background vocals
- 1 instrument microphone for guitar amp

## ***Other Instruments***

The keyboards will be sub mixed on stage with a Mackie 802-VLZ3, no DI-Box needed.

The drum tracks will be played on a laptop/looper with cinch outs, DI-Box needed.

The bass amp has a built-in DI-Box.

## ***Monitoring***

At least three wedges with independent mixes are needed. Four wedges would be nice.

## ***Contact***

If there are any open questions or if additional information is needed please contact me!
