

## Techrider Looneytunez

The Looneytunez are a fully electronic Live Karaoke Band performing national and international Karaoke Parties since 2013. They bring all their Instruments and the necessary Karaoke Tech (Lyric Screens, Big Screen for the Audience to Sing along)

This is what is a list of things the Venue has to have.

### **Stage:**

- Size 4x3 m minimum
- Stagelight basic
- 2 Full Range Stagewedges ( 12" ) for the Karaoke singers
  - > *since the Band is completely silent on stage (electronic equipment + in ears) the Wedges have to deliver a full Stereo Sound on Stage (not just the Vocals)*
  - > *since most Karaoke Singers are rather new to singing live, it would be great if the Wedges are already EQd to reduce feedback for the Soundcheck*
- Power on both sides of the Stage (Stageplot)
- IF INCLUDED IN THE VENUE / STAGE: Big Projector Screen behind the Band including a Projector. (Alternatively the Looneytunez can provide a moveable Flatscreen for the Audience)
  - > *Projector Screen or Flatscreen are for the Lyrics for the Audience to sing along. They should be Placed in a way, that the view is not obstructed*

### **Channels / FOH:**

The Looneytunez take care of their own In Ear Mix. The FOH receives all Instrumentchannels from the Looneytunez Console. The Vocal Channels (4xBand, 2xKaraoke Front) are Split on Stage so that FOH and Looneytunez can take the Signals from the Splitter.

Monitorsound for The Karaoke Singers (Wedges) and Sound for the Venue are mixed by the Venues FOH

### **Channels:**

### **Bandconsole to FOH:**

#	BELEGUNG	Preferred MICS
